

# Why Licensing Exams in the Country of Study Matter for Indian Students Studying MBBS Abroad (Post-2021)

# NMC's New Rule (Post-2021)

The National Medical Commission (NMC) has made it mandatory for Indian students studying MBBS abroad to:

Obtain a medical license from the country of study.

This applies to all students enrolled after 2021.

Failing to do so makes them ineligible to practice in India

# What This Means for Indian Students?

- It is a major eligibility criterion to return and practice in India.
- After completing the MBBS degree abroad, students must pass the local licensing exam.
- Without which, students cannot get an Indian medical license.

# Key Factors to Consider about the Licensing Exams

**Before choosing a country, students should know about:**

Exam Difficulty

Pass Rates

Time & Cost

# Why Forehand Knowledge on the Medical Licensing Exams is Important?

To Make informed decisions

Prepare in advance

Avoid unexpected challenges

# Popular Medical Licensing Exams & Licensing Requirements in Various Countries

# Popular Licensing Exams Abroad

**USA: USMLE (United States Medical Licensing Exam)**

**UK: PLAB (Professional and Linguistic Assessments Board)**
